

## **UNTRUTH OF THE PROPAGATE THESIS ABOUT COMPETITION BETWEEN RAILWAY COMPANIES**

### **Summary**

Improvement the Polish railways was based on untruth circumstance that between railway companies can be competition. In my opinion for people who have sufficient knowledge about working railway companies, this article confirmed this thesis. Practice evidence that this thesis is true, is complete decomposition divided and privatized English railways and renewed their nationalization, and true enough that others economic developed country stopped this process.
