

SEA PORTS AND PORT SERVICES IN THE SEA ECONOMY OF WESTERN POMERANIA

Summary

The article presented the potential of sea economy of Western Pomerania, which comes from:

- two ports of key importance to the national economy – the ports of Szczecin and Świnoujście, whose potential comes from trans-shipment, storage capabilities, as well as commercial and industrial functions performed,
- port of Chemical Industrial Plant in Police,
- ports that are not of great significance to national economy, located on Zalew Szczeciński, Zalew Kamieński and along the sea coastal line.

Directions for further development of the specified ports were formulated in a synthetic way.
