

**DEVELOPMENT CHANCES OF TOURISM INFORMATION SYSTEM  
ON THE BASIS OF STUDENTS' RESEARCH RESULTS**

**Summary**

The main goal of the work is to determine in what extend people studying tourism and recreation, so people who prepare themselves for working in tourism sector or in sectors related to tourism, are aware of the meaning of information in tourism development. It will let estimate their possibilities and need of joining in creation and managing the regional tourism information system in Podlaskie voivodship.

The main subject of research works were students of third year of Tourism and Recreation Management Division at Technical University of Białystok, which university is the only one in North-Eastern Poland that educates in that profile.
