

**OPPORTUNITIES AND THREATS OF THE DEVELOPMENT
OF THE SECTOR OF COMMUNAL SERVICES IN VIEW
OF POLAND'S ACCESS TO THE EUROPEAN UNION**

Summary

The identification of opportunities and threats connected with the accession of Poland to the European Union is related to some difficulties. It results from the complexity the problems and the dynamics of phenomena. SWOT analysis showed that Poland's access to the European Union will bring more opportunities than threats. Unfortunately Polish enterprises which provide communal services have more weak than strong points.
