

**FORMS VOIVODSHIP SELF - GOVERNMENTS
BUDGET SUBSIDIZATION FROM STATE BUDGET**

Summary

The article is devoted to problems related to the choice of the form and scale of territorial self-government units budget subsidization. The author advocates the idea of introducing solutions which would make the voivodship with low financial potential more active as well as introducing an assessment system for the costs of realization of particular tasks.

The author believes that one of the basic objectives of the public finance reform is to take into account and explicitly indicate voivodship self-governments as an object of regional policy.
