

## **FINANCIAL INTERMEDIATION INSTITUTIONS' EFFICIENCY ACCORDING TO PROFITABILITY RATE**

### **Summary**

Banks, insurance companies, investment funds and open pension funds transform savings into investments. Those can be named as financial intermediation institutions and treated as public trust institutions. Its finance balance is a picture of national economy. That is why it is strictly necessary frequent analysis of those institutions' economical efficiency. In the paper such analysis has been made according to profitability rate. It shows, finance situation is good in main finance institutions but also significant profitability level differences among it are noticed. The reason of those differences can be found in specification of single institutions.
