

HOUSEHOLD BANKRUPTCY AS RESEARCH PROBLEM OF FINANCE

Summary

On the ground of track record of the subdisciplines assembling widely understood financial teaching, it is noticeable that more interest is being paid to the area of teaching and economical practice of the household, family and individuals. Crediting of individuals in Poland is dealt with, in its early stage, by the area of finances - household finances (individual, personal) - adherent to complex and controversial issues, undertaken by economic disciplines. The necessity of development and scientific reflection „maturity degree” increase over households financial problems, including crediting, in the context of insolvency and bankruptcy, has been noticed in Poland. Household finances is the area dealing with individuals and natural persons, as distinguished and economically independent microsubjects, composing the lasting element of subjective structure in all hitherto existing forms of management.
