ACCESSIBILITY OF SEA PORTS OF THE ODRA RIVER ESTUARY
FOR SEA-SHIPPED CARGO IN THE NORTH CORRIDOR

Summary

The article focuses on the presentation of:
– basic characteristics of the most important ports in the Odra River estuary,
– analysis of the cargo flow carried in relation to other ports of the North Corridor realised in recent years,
– investments both within these ports and within access to them from the sea and from the land, aiming at the enhancement of services for cargo shipped by sea within the North Corridor.
