CUSTOMS INSTRUMENTS IN THE RANGE OF SECURITY STANDARDS AS A FACTOR OF COMPETITIVENESS ON THE TSL MARKET

Summary

The main aim of this paper is to identify the customs instruments that can guarantee improvement of security standards in the international transports.

In the situation of developing globalization and liberalization processes, improving security standards constitutes one of the most important tasks of customs. Implementation of customs regulations in the range of security rules is an essential factor of achieving competitive advantage between particular companies in TSL market.

The paper presents tasks of each member of supply chain, relating to the new rules of security control in the international exchange. There has been done an analysis of the most significant legal regulations relating to security rules. Especially noticeable are: the risk analysis system as a legal tool of customs control, regulations refering to Authorised Economic Operator (AEO), Export Control System (ECS), Import Control System (ICS), Economic Operators' Registration and Identification (EORI), Registration Evaluation Authorisation and Restriction of Chemicals (REACH) and European Database Export Import of Dangerous Chemicals.
