INNOVATIONS OF PPP IN TRANSPORT INFRASTRUCTURE DEVELOPMENT IN EUROPE

Summary

Enormous investment needs in infrastructure, caused by technological and technical changes and necessity of modernization of existing objects and networks, have evolved an approach to PPP concept.

At present Europe is on stage of propagation and extension of PPP project scale. A positive attitude to PPP developments has been seen at legislative changes, both in EU level and EU countries, as well as in growing number of PPP projects in advanced EU countries and new member countries.
