ZRÓŻNICOWANIE ROZWOJU EKOTURYSTYKI
W WOJEWÓDZTWIE ZACHODNIOPOMORSKIM

DIVERSIFICATION OF ECOTOURISM DEVELOPMENT
IN WESTERN POMERANIA REGION

Summary

The paper presents analysis of spatial diversification of administrative district level attractiveness in West Pomeranian province from the point of view of capability of development in ecotourism. In analyses used indicators for characterizing attractiveness natural environment and indicators measuring level of pollution. Classification of administrative district done with two methods: taxonomical measure of development and method of k average.
