

THE ROLE OF PROF. WOJCIECH BĄKOWSKI DURING THE DISCUSSION CONCERNING ORGANIZATIONAL CHANGES OF URBAN TRANSPORT OPERATORS

Summary

Operators serving services of public transport during the transformation, which was accomplished in years 1990-2010, were subject to changes of organizational forms - from primarily dominant, budgetary form has become the solution in minority. Prof. Bąkowski paid attention in his publications for necessity for changes. Output of this representative of Szczecin School of Transport Economics were the source of knowledge for plenty of researchers and practitioners. From the perspective of time we can see, that prof. Bąkowski accurately estimated fields of transformation in this transport sector, not even once outrunning opinions of scientific environment and going "upstream" for the position presented by people managing public transport. Keynotes of prof. Bąkowski deserve exposure and continuation.
