

## **BETWEEN THE UTOPIA AND THE REALITY OF THE DEVELOPMENT OF INFORMATION SOCIETY**

### **Summary**

The article presents the chosen aspects of analysis which verifies the realization potential of development strategy of information society at the level of the whole country. The substantial aspects of this strategy and the strategic bond at the European Union level were not included. However, methodological aspects were exposed. According to the writers/authoresses, the stage of looking for a view point is crucial as well as the aim of making the widely implied realization potential better and minimizing the delusion and utopianism. The significance of the hierarchy of the epistemological strategies levels and strategies aimed at ruling were signalized in the contexts of the structure of this process and the system of measuring the result.
