

### **THE 55 + GENERATION IN THE IT SOCIETY Summary**

The deep socio-economic transformation that contributes to the growing pace of economic and social development of the world as well as the educational progress and visible enhancement of life quality is set against adverse demographic phenomena, such as the aging of the society and the low professional activity of people aged 55+. Moreover, the vast part of the older generation suffer from digital exclusion, as they spent most part of their youth and their professional lives in the world where there were no computers and no knowledge on information technologies.
