

## **ELECTRONIC TOOLS FACILITATING OPTIMIZATION OF LOGISTIC OPERATIONS IN THE AGE OF INFORMATION SOCIETY**

### **Summary**

The article presents typical features of RFID as an example of electronic tools facilitating logistic operations in the age of information society. The RFID technology is used among others in the implementation of Just-in-Time strategy. This paper focuses on the analysis of case studies described in pertinent literature (both Polish and foreign). The author formulates a question which is answered in the findings. What is more, the final conclusions suggest that the research shall be continued in the field of the implementation of such tools in business.
