

**MULTILINGUAL FACILITY OF INFORMATION PORTALS ON
THE EXAMPLE OF BALTIC MUSEUMS 2.0 ONLINE INFORMATION
PLATFORM**

Summary

The article presents *BalticMuseums 2.0* Online Information Platform as an example of a multilingual information portal based on CMS Drupal. Multilingual facility of a website is a challenging issue due to both technical and organizational issues. In order to ensure that Online Information Platform content is up-to-date, correct and available in all agreed languages it was essential to consider both technical as well as organizational aspects of the translations process. The article discusses the applied solutions and accepted assumptions concerning these issues.
