THE ROLE OF SECURITY AND DATA PROTECTION IN REGIONAL DEVELOPMENT

Summary

This article contains a brief survey of the different methods and approaches for the risk evaluation and analysis. Proposed idea should be particularly useful in local governmental unit systems. such systems can consist of many separated subsystems with completely different security mechanisms. In this article, was proposed to verify the quality and integration of these mechanisms on the basis of the initial risk analysis. The purpose of the article is to present the concept of a construction of a coherent security policy for these units based on the results of the risk analysis.
