Summary

Western Pomerania has already got a 60-year history of training teachers of physical education at different levels. The purpose of this paper is to present some of the statutory work of the Institute of Physical Education of the state tertiary vocational school in Walcz dedicated to local and regional communities.

The most important task of the state tertiary vocational school in Walcz is to educate students attending different courses and specializations primarily in order to prepare them for future work or continue their education at masters level as well as all kinds of community activities, cooperation with institutions, associations and clubs responsible for the physical education that promote active, healthy lifestyles among children, youth, adults - the residents of Walcz.
