LOCAL DEVELOPMENT IN COMPARISON WITH CONTEMPORARY DETERMINANTS - RECOMMENDATIONS FOR PRACTICE OF SELFGOVERNMENT AUTHORITIES

Summary

Local development carried out under the so-called “localism” orientation is focused on the permanent and systemic changes at the level of municipalities and districts. Boosting growth is the main task of subnational government and local community. In the poor condition of public finance the full implementation of local development programs is difficult. Creating of local entrepreneurship and increasing activity and engagement of local communities in the process of local development should be assessed positively. Great epochal challenges await or the implementation.
